Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Skeletal remains (backbones, ribs, jaws & teeth) of sockeye salmon observed in small tributary stream. Location was about 1000 feet upstream of stream's mouth at Little AFognak Lake. Observation made by Jane Tonkin (Alaska Dept. of Environmental Conservation) and Will Haag (Koncor).

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
