Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Small numbers of King Salmon 25-100, Chums 100-500 sockeye 25-100, & Coho salmon 100+ spawn in grassy creeks as documented by aerial surveys.

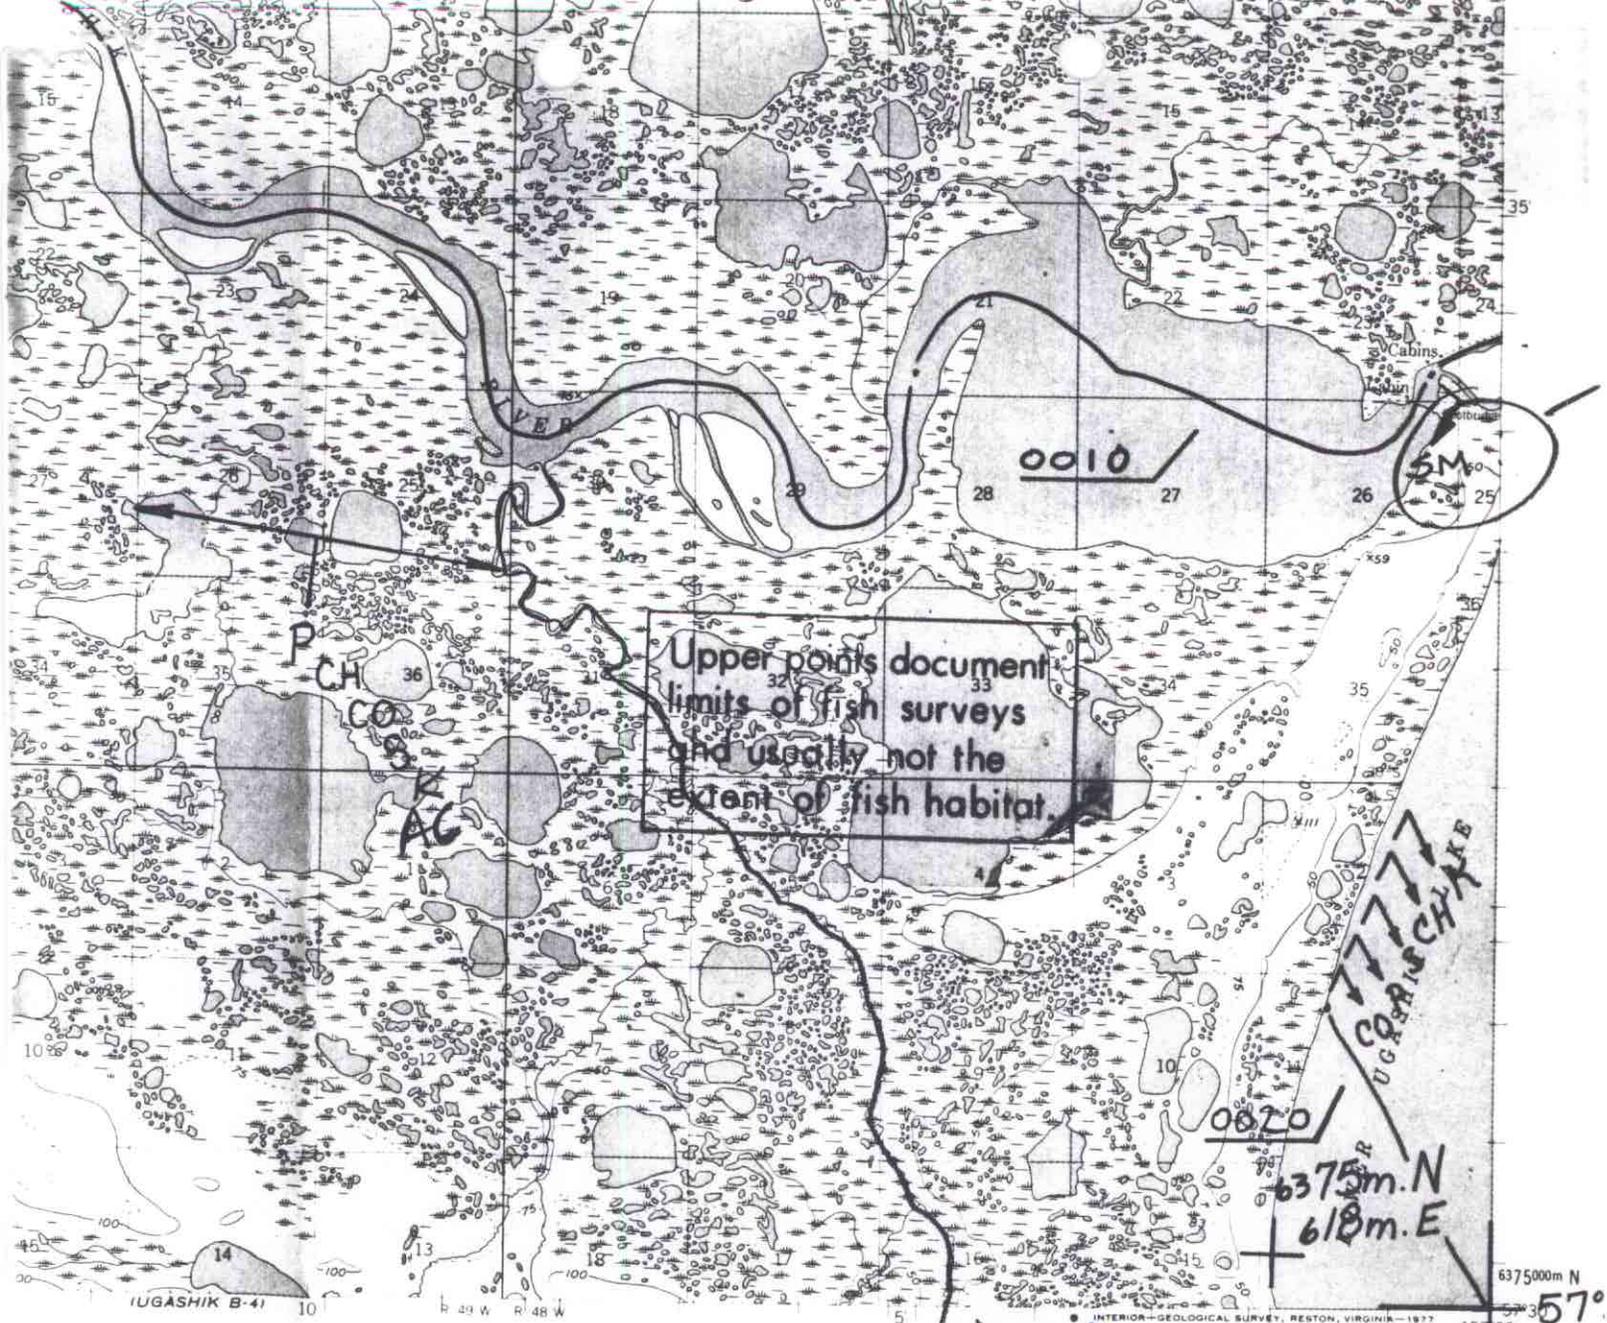

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Attached are the maps which have been revised for the 1989 update of the Anadromous Stream Catalog and a listing of the proposed revisions. Please take some time to review these proposed revisions for the streams in your area. If any of the revisions are not represented accurately, draw them on these maps as they should be depicted and return the maps to me. Any corrections to this year's revisions must be made before these maps go out for public review.

Please return these maps, along with any comments, to me by December 30, 1988.
