<u>Coho</u>	<u>'88-'91 Oct-Nov.</u>	<u>—</u>	<u>—</u>		

Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:

Adults spawn in system all the way to headwaters. Large undercut banks make fish observation difficult. Estimate 300-500 adults enter system to spawn.
