OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Dolly Varden	7/1/93		38		
Coho salmon	7/1/93 + 9/7/93	8	6		
pink salmon	8/15/93 + 9/7/93	422			
3-spine stickleback	7/1/93		2		

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Fish captured during 300 seconds of electrofishing effort on 7/1/93 included 38 Dolly Varden, 6 coho salmon, and 2 stickleback. Range of fork lengths: Dolly Varden 24-267 mm, coho 57-70 mm, stickleback 46-52 mm

Adult salmon observed during foot surveys included 42 pinks on 8/15/93, 380 pinks on 9/7/93 and 8 coho on 9/7/93.

Habitat and Restoration Division
333 Raspberry Road
Anchorage, Alaska 99518-1599

Dear Ed:

Enclosed are several nominations for the anadromous fish catalog as a result of our anadromous fish surveys on Adak this summer. To help cross reference each nomination form with the physical location of each stream, I have enclosed photocopies of maps with numbers designating different streams. The number of each stream appears in the upper right corner of each nomination form. The maps are photocopies of 1:50,000 scale maps prepared and published by the Defense Mapping Agency in Washington D.C. This map is apparently out of print, however another version of this larger scale map is available. Joe Meehan with the refuge in Adak will send you a copy of this map. Please contact me if you have any questions regarding these nominations.

Sincerely,

Doug Palmer
Fishery Biologist
