OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
PINK					

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: ADDITION BASED ON HISTORICAL ADF&G-CFMD SALMON ESCAPEMENT SURVEY DATA (ATTACHED).

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Location: 58°30'36" North latitude, 153°26'54" west longitude. Observed via aerial survey in helicopter, approximately 300 pink salmon in lagoon at stream mouth and another 75 in the lower reaches of the stream. Stream drains a muskeg type lake. Observed no salmon in lake or upper reaches of stream.
