OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Coho salmon	9/25/94	<input checked="" type="checkbox"/>			<input checked="" type="checkbox"/>
Dolly Varden	9/25/94				<input checked="" type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Observed 80 adult coho salmon during an aerial survey with a helicopter. Also observed many large Dolly Varden, but they were not enumerated. Water clarity was "good." We landed and captured 3 coho salmon for biological sampling.

Mr. Prokopowich:

Enclosed are some nominations for revision to the *Catalog of Waters Important to the Spawning, Rearing or Migration of Anadromous Fishes* in response to Edward Weiss's letter dated September 2, 1994 (copy enclosed). My nominations are based on work I conducted this summer from August 22 to September 26, along the coastal waters of the Alaska Peninsula from Wide Bay to Yantarni Bay. As the ADFG Area Biologist for that area, please evaluate nominations and sign off on the forms, if appropriate.

I realize I have missed the November 1 deadline stated in the letter. If it is too late for these nominations to be considered for the 1994 revision, please consider them for inclusion in the 1995 revision.

I appreciate your help on this matter. If you need any additional information, please write, or call me at 246-3442.

Sincerely,

Mary A. Faustini
Fishery Biologist
