OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
coho salmon	November 6, 1997		juvenile		

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Two juvenile coho salmon were observed in this section of creek during a survey conducted by Steve Schrof (CFMD, Kodiak) and Rob Markle (CFMD, Kodiak) on November 6, 1997. A backpack electroshocker was used to determine fish presence in survey section. The survey was conducted from creek origin in muskeg downstream to just above confluence with E. Fork Twin Creek. Wayne Hutchins of Lesnoi, Inc. witnessed survey. Thirteen Dolly Varden were also observed.

**Subject:** electrofishing  
**Date:** Wednesday, November 12, 1997 10:57AM

Hi Steve:

Rob Markle, Steve Schrof and myself worked with Wayne Hutchins last week to complete the electrofishing of the Chiniak creeks in question. The enclosed file is a spreadsheet with results. I will mail you a hard copy of the results along with a map that has each creek area numbered.

Originally, you had mentioned that your project budget could pick up line 100 expenses. Do you have a code? The work took 3 days for two people, including 1 day of preparation. <<File Attachment: CHINIAK.XLS>>

### Message:

Here you go Hutch. Review and feel free to make comment. I have left a copy for Steve Honnold to review and he will likely send it to Habitat late next week.
