OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho salmon	<u>autumn 1994</u>			100 adults	<input checked="" type="checkbox"/>
Sockeye salmon					<input checked="" type="checkbox"/>
Pink salmon					<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Add species coho to stream and lake based on attached information from ADF&G staff Jim McCullough and Donn Tracy.

SUBJECT: Revisions to Catalog
of Anadromous
Streams

I spoke with Donn Tracy, shellfish biologist ADF&G Dutch Harbor, who is an avid fly fisherman about coho stocks around Unalaska. He was in Dutch from 1990 through 1995. Donn is currently in the ADF&G office at Kodiak, 211 Mission Road, 99615.

He saw adult coho in the following topo map C-2.

Summer Bay Lake: 302-31-0010

~400 adult coho in the lake and upstream as far as noted on the map.

Morris Cove Lake: 302-31-0010

~100 adult coho in the lake and upstream as far as noted on the map.

Kalekta Bay Lake: 302-28-0010

~few Kokanee in the two small lakes to the east of Kalekta Bay Lake

~few pink and sockeye and ~400 coho in lake and upstream as far as noted on the map

Unnamed Lake: 302-20-0010

~100 coho in addition to the sockeye and pink salmon
