OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Pink Salmon	7/24 - 9/2 1963-98	X			X
Chum Salmon	" "	X			X

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Documentation by Alaska Department of Fish and Game (ADF&G) personnel during aerial surveys to enumerate salmon escapement beginning in 1963 the peak count for pink salmon (7,000) was observed on 9/1/77 and the peak count for chum salmon (1,000) was observed on 8/13/76. ADF&G has assigned 282-12.03 to this stream which is located in Zachary Bay on Unga Island...
