OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
PINK SALMON	8/1 AND 9/8 1998	X			

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: IFLY AERIAL SURVEY (FROM SMALL FIXED WING PLANES AT 500' TO 1000') FOR ADF+G TO ASSESS SALMON ESCAPMENTS. SEVERAL TIMES IN PAST YEARS I HAVE OBSERVED SALMON SPAWNING IN THE UPPER REACHES OF WATCHOUT CREEK, ABOVE THE CURRENTLY DOCUMENTED DISTRIBUTION. IN 1998, ON 8/1 I SAW APPROX 400 PINK SALMON SPAWNING IN THE AREA MARKED ON ATTACHED MAP AND ON 9/8 I SAW PINK SALMON CARCASSES (~100) IN THE SAME AREA. I HAVE ALSO MARKED THE UPPER LIMIT OF FISH PASSAGE. ABOVE THIS POINT THE STREAM BECOMES A SERIES OF CATARACTS AND STEEP FALLS.

Name of Observer (please print) KEVIN BRENNAN
 Date: 12-15-98 Signature: [Signature]
 Address: ADF+G; 211 MISSION ROAD
KODIAK AK 99615

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.
