**Subject:** AWC stats

Lakes	1612
Polys	70
Streams	16438
Total	18120

- The extra 3 that you have are
- 247-41-10200 Susitna River has 2 mouths
- 334-30-11000 Yukon River stat area has 2 mouths
- 243-10-10150-2006-3028-4021 MIDB point is coded as LOWER (has 2 lowers)

There are several issues that Skip pointed out that need to be resolved. We need to make some rules and stick to them (like about arcs across lakes and slough numbering). I'm working on a list of these.....

Also the error I found in WST is in the catalog and point files.....  
The maps and arcs are numbered correctly.....334-20-11000-2442.  
The catalog and points are wrong.....334-20-11000-2142.
