Nomination # _____

Regional Supervisor — Date 11/14/86

ak SPT — Date 11/20/86

Drafted — Date

Species	Date(s) Observed	Spawning	Rearing	Migration
Sockeye salmon	8/20/86			✓

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

On the first day of a raft survey, starting from Gold Lake, we observed visually two sockeye salmon (red body, with green heads, and no fungus) approximately 1/3 of the way from Gold Lake to the confluence with the Kisaralik River.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
