Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Chum, King, and coho salmon were observed visually while walking the lower 1 mile of Quartz Creek on a stream survey, specifically looking for adult fish. Coho and king juveniles were caught in minnow trap 50-100 yds upstream from the confluence with the main kisaralik.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
