Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Fish collected by electroshocking at a station located just below junction of 8025 and 7035. Upper limits established by aerial observation from helicopter based on blockages noting barriers to upstream migration

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
