IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

Twelve juvenile silvers were captured in minnow traps that were set from 9/4/96 - 9/5/96. The furthest upstream trap was placed 350 meters from the tributary's mouth. Sizes ranged from 58 to 74 mm's. Seven dolly/char juveniles were also captured, and ranged between 80 & 152 mms. One redd was observed 60 meters upstream from the tribs mouth. The trap locations were R58W T3N sec 19 SE 1/4 NE 1/16

Name of Observer (please print): Cooper d Smith

Signature: Daid J Clamm USFWS Date: 3/3/99

Address: Box 7191
Bethel, AK 99559

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist: C. Wayne Dolezal
