

Montana Creek (Stream No. 111-50-10500-2003) Tributary

Habitat Biologist Jackie Timothy and I tracked and trapped this stream on 5-11-10. This tributary connects to another uncataloged tributary flowing into Montana Creek. The last waypoint (23) is below a possible barrier. The stream provides excellent rearing habitat. Water level was very low during the survey. No barriers between wp 19 and 23.

Waypoint	Location	Description
19	58.4383, -134.6453	Confluence with other uncataloged tributary to Montana Creek
20	58.4384, -134.6461	Trap, 2 coho 50mm
21	58.4385, -134.6464	Trap, 2 Dolly Varden 60mm
22	58.4385, -134.6466	Trap, 5 Dolly Varden 45-80mm
23	58.4388, -134.6471	Potential barrier at current water level
