

Windfall Creek Tributary 2 (111-50-10070-2004-3006)

Windfall Creek tributary 2 was surveyed by Sport Fish technician Matt Kern and I on August 4th, 2010. This trib originates in a large grassy marsh and flows to meet Windfall Creek on the right bank. The stream is well-defined after emerging from the marsh. Lots of large woody debris provide good rearing habitat and the substrate is mainly small gravels and sand with intermittent deep organic mud. The trib was sampled using a hand net and visual identification to determine fish species. Fish were either netted or visually identified up to waypoint 17, where the stream became a seep. The following table and map illustrate sampling data and locations of upper and lower extent.

WAYPOINT	LAT	LONG_	DESCRIPTION	EFFORT	SPECIES
16	58.512005	-134.74006	TRIB ON RIVER RIGHT. SURVEYING.		
17	58.512209	-134.73699	TRIB ORIGINATES AT THE SAME GRASSY MARSH. BAITED AND VISUAL ID OF COHO ALLTHE WAY UP.	VISUAL ID	CO
