IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
 Sampling method was a dipnet, although, fish were attempted to be caught using minnow traps with no success. Only one was captured but there was a small school of approximately 12 seen on 8/2/2012 and 8 seen on 8/7/2012.
