

BLIND SLOUGH TRIBUTARY 5 ADDITION

Stream: Blind Slough Tributary 5

Watershed: Ohmer Creek-Frontal Sumner Strait

MTRS: C061S081E, Petersburg C-3

Date Surveyed: June 4, 2013

Findings: This creek is an uncataloged tributary to Blind Slough. We caught coho salmon up to the treeline. The stream ends in a mossy seep upstream of the culvert (Table 1 and Figure 1).

Recommendations: Add this stream to the Anadromous Waters Catalog.

Table 1: Blind Slough tributary 5 survey data.

Waypoint	Latitude	Longitude	Notes	Sample Effort	Sample Results
403	56.5660	-132.7344	Mouth of tributary. Rocky at treeline already.		
404	56.5660	-132.7343	At base of round boulder cascade.	EF	Multiple CO
405	56.5659	-132.7341	Outlet of culvert. Lots of angular cobbles/boulders riprap below.		
406	56.5660	-132.7337	Inlet of culvert. Nothing since below treeline.	EF	No Fish
407	56.5662	-132.7337	Stream becomes a messy seep across the road. No fish.
