**Findings:** We surveyed stream 111-50-10750-2027-3008 and caught coho salmon, Dolly Varden char, and cutthroat trout using an electrofishing unit (Table 1). While surveying the stream we observed a pair of adult coho salmon making a redd. This stream has two different locations where side channels have been created. We ended the survey because we did not capture any anadromous fish in a while.

**Recommendations:** Correct the current course in AWC.
