

## 1<sup>ST</sup> WATERFALL CREEK

**Water body name:** 1<sup>st</sup> Waterfall Creek

**Water body number:** 101-90-10700

**Watershed:** Naha River-Frontal Behm Canal

**Findings:** This stream's currently cataloged route is inconsistent with the actual field-verified route. Additionally, coho juvenile salmon were captured in a tributary to this stream, so coho rearing needs to be added to the AWC database.

**Recommendations:** Please update this stream's route to reflect the field-verified route, and add COr to the AWC database.

## ROUTE CORRECTION

**Survey date:** 5/7/2014

**Species & Lifestage:** Pp

**MTR:** C074S090E **Quad:** Ketchikan B-6

Table 1.-1st Waterfall Creek Survey Data.

Waypoint	Latitude	Longitude	Notes	Sample Effort	Sample Results
38	55.4735	-131.7889	Where tidewater influence ends		
39	55.4732	-131.7892	stream forks, tracking main flow.		
40	55.4724	-131.7882	Culvert outlet that goes under tongass ave, has good pool at base but is perched 2' and there are several pipes in and around this area.		
41	55.4723	-131.7880	Culvert inlets, pipes enter RL of culvert.		
42	55.4709	-131.7855	20' barrier falls here. Looks like there is an old dam at the top where the channel narrows. Wood culvert also at the base of the falls.		

Figure 1.-Barrier falls on 1<sup>st</sup> Waterfall Creek.
