OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho salmon	7/7/2014		4		<input checked="" type="checkbox"/>
Dolly Varden	7/7/2014			84	<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments

Sampling methods: Backpack electrofisher (400V)
 Observed upper extent of anadromy (NAD83 Decimal Degrees) 61.71950, -149.10278
 No individual barrier identified, stream is narrow and steep upstream of observed upper extent with little spawning and rearing habitat. All Coho and Dolly Varden observed were age 0+
 Sample reach extended from Oceanview rd. upstream to the above waypoint.

Name of Observer (please print):

Signature: _____ Date: _____

Agency:

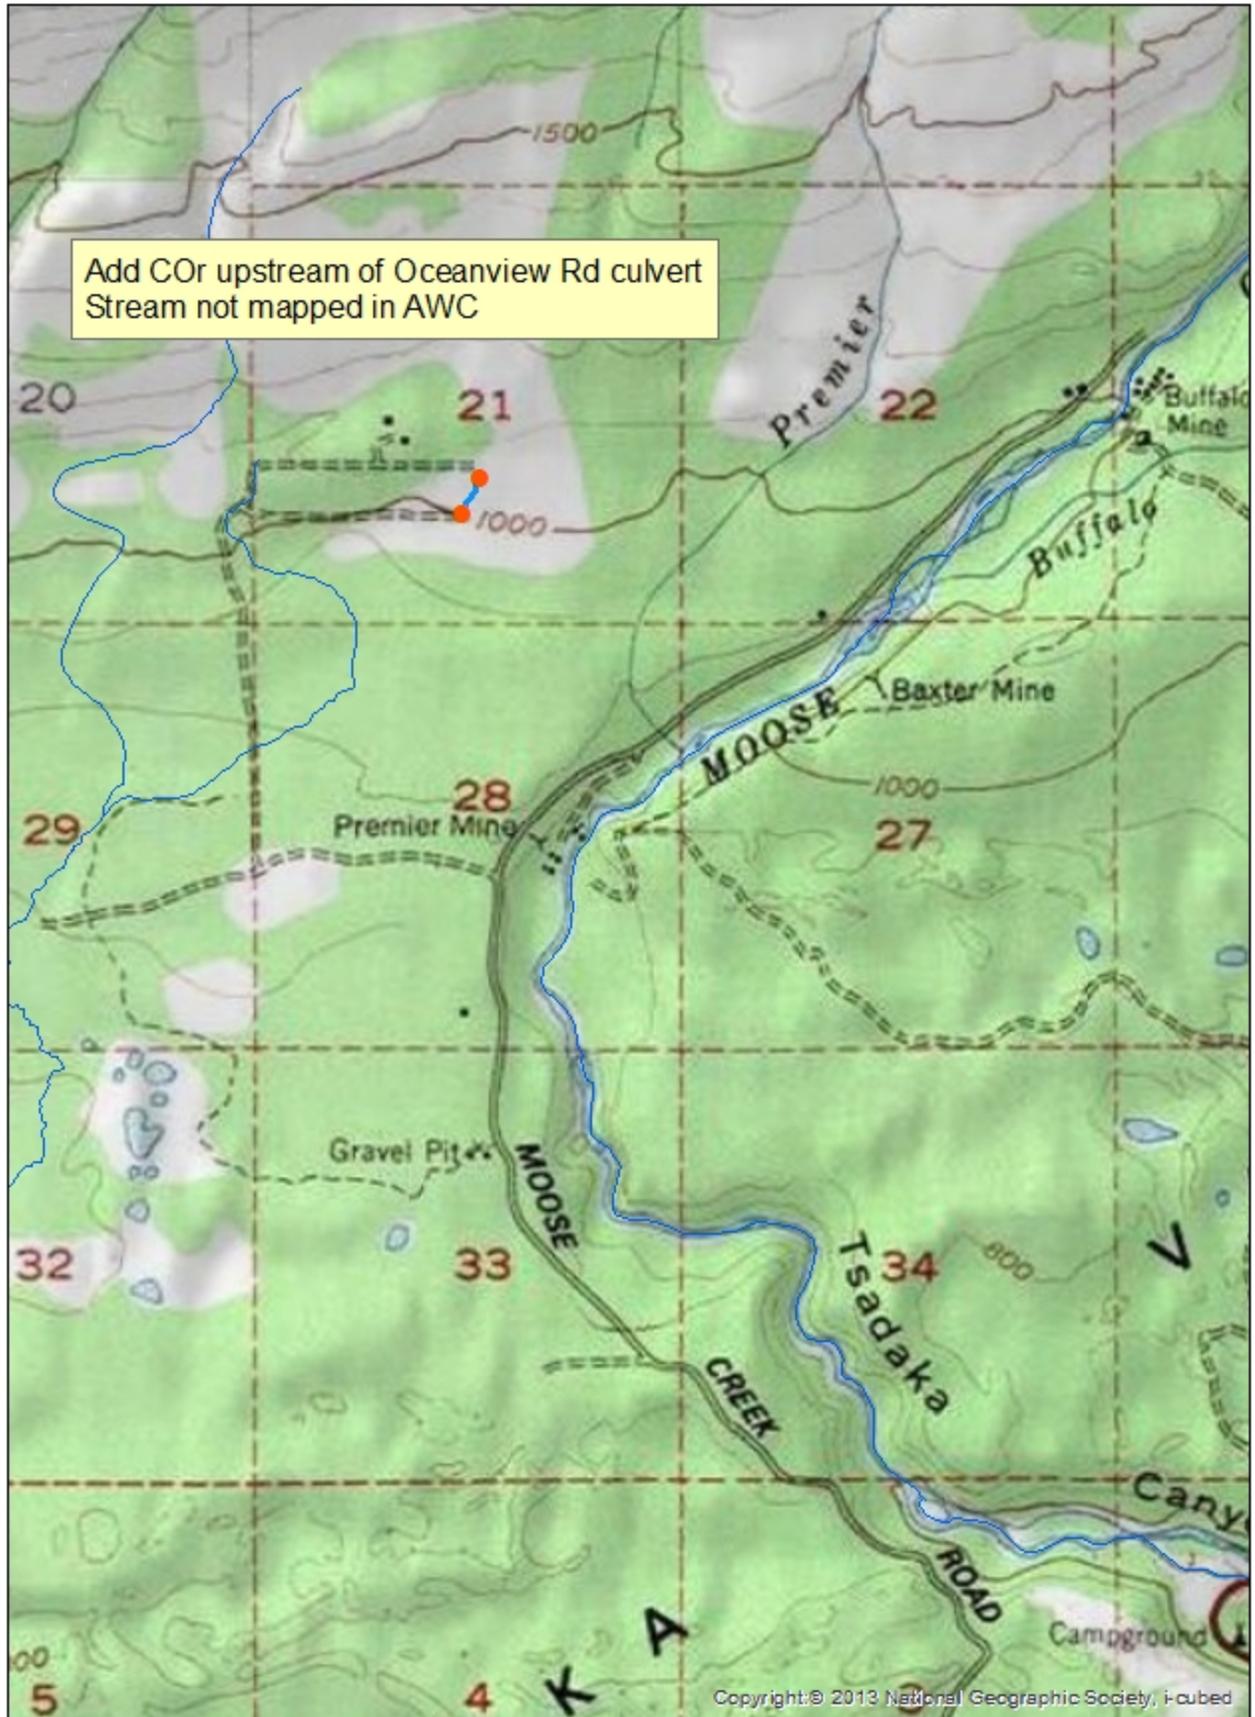

Address:

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.

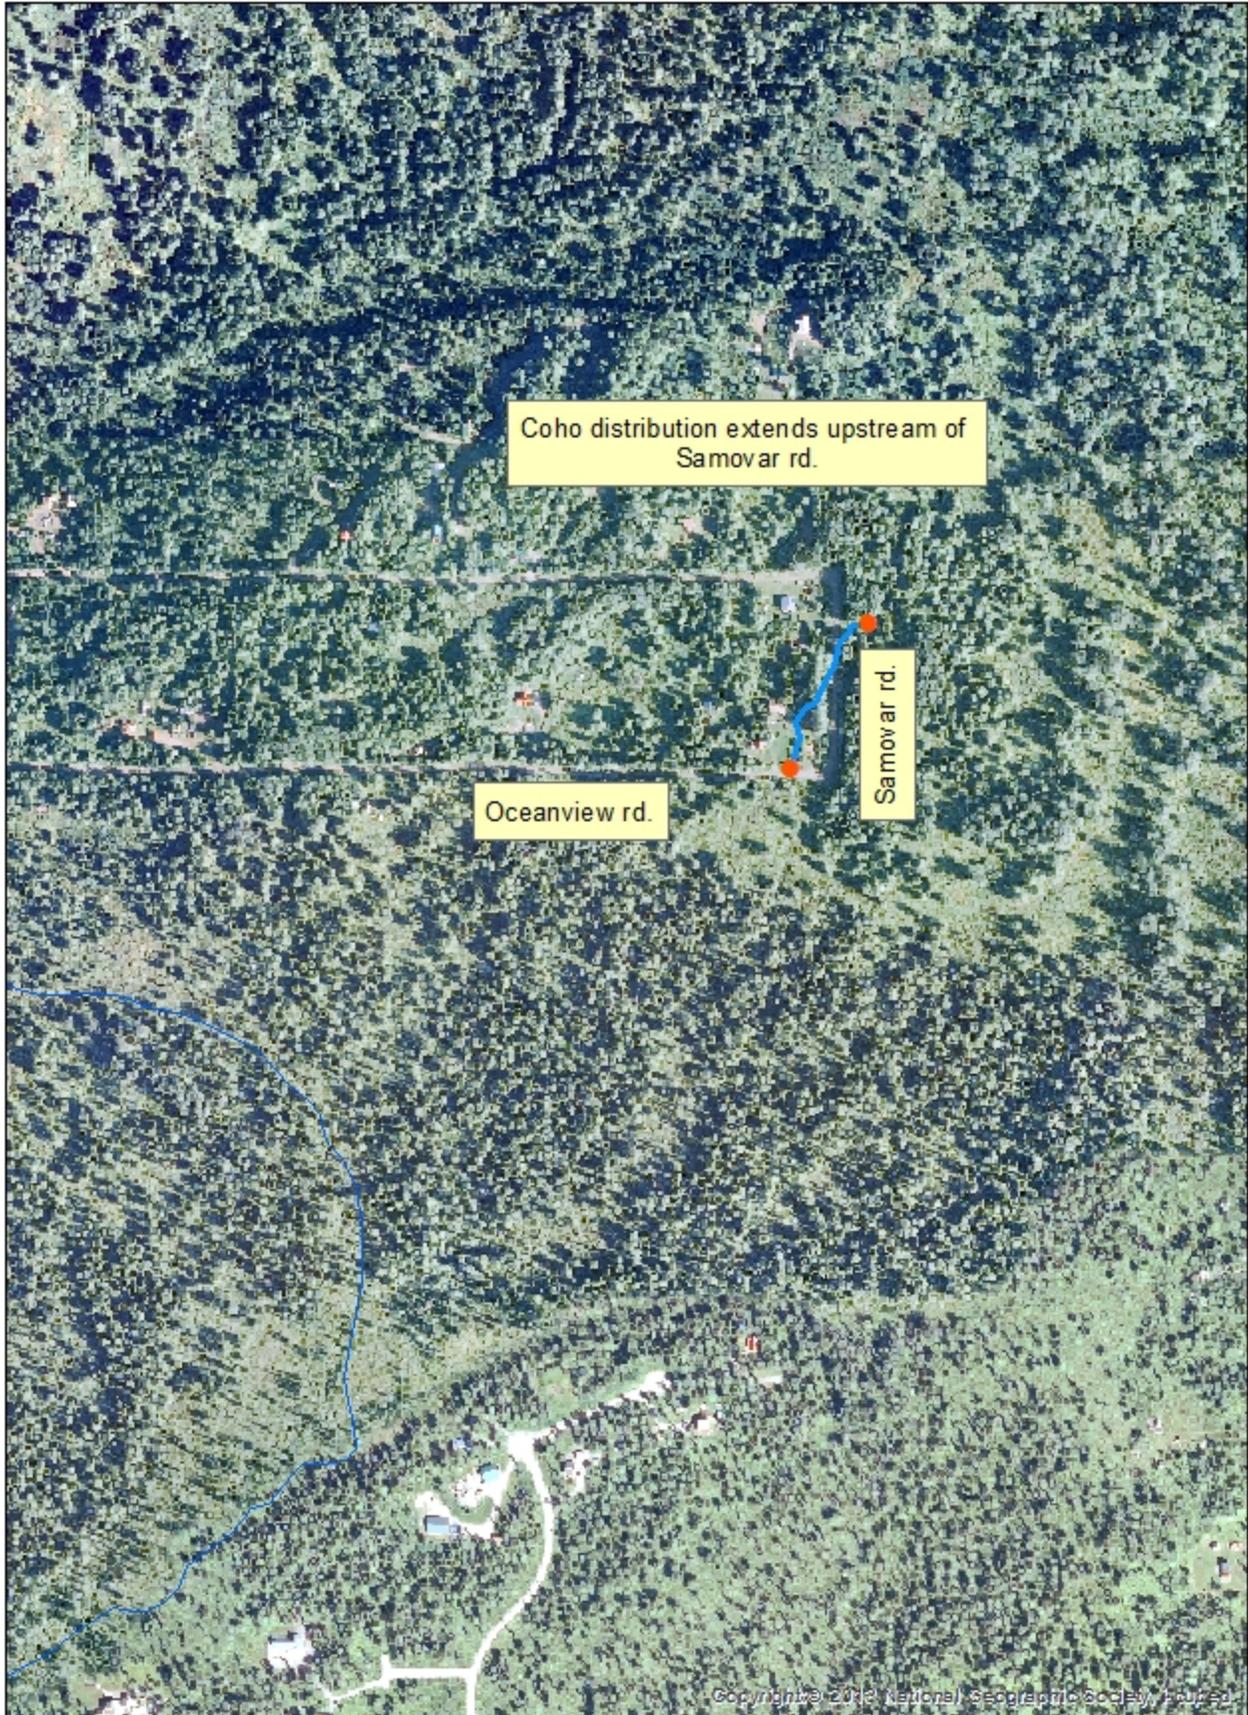

Signature of Area Biologist: _____ Date: _____ Revision 11/13
 Name of Area Biologist (please print): _____

Juvenile coho salmon

Approximate location of reach to be added to AWC

Aerial photo depicts sample reach where coho salmon were found. The stream is not mapped but is listed as a Wasilla Creek tributary
