OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho Salmon	7/2/2014		11		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments

Sampling method: Backpack electrofishing (350v)
Upper extent of anadromy (NAD83 decimal degrees) 61.77271, -150.05720
Barrier encountered at Alaska Rail Road, no culvert exists within the railroad prism, only a small amount of seepage flows through. Upstream of the Alaska rail road the stream has been diverted down a ditch to a Willow Creek side channel.
Age 0+ and 1+ coho were found between the Parks Highway and Alaska Railroad (age 1+ >80mm fork length)

Name of Observer (please print):

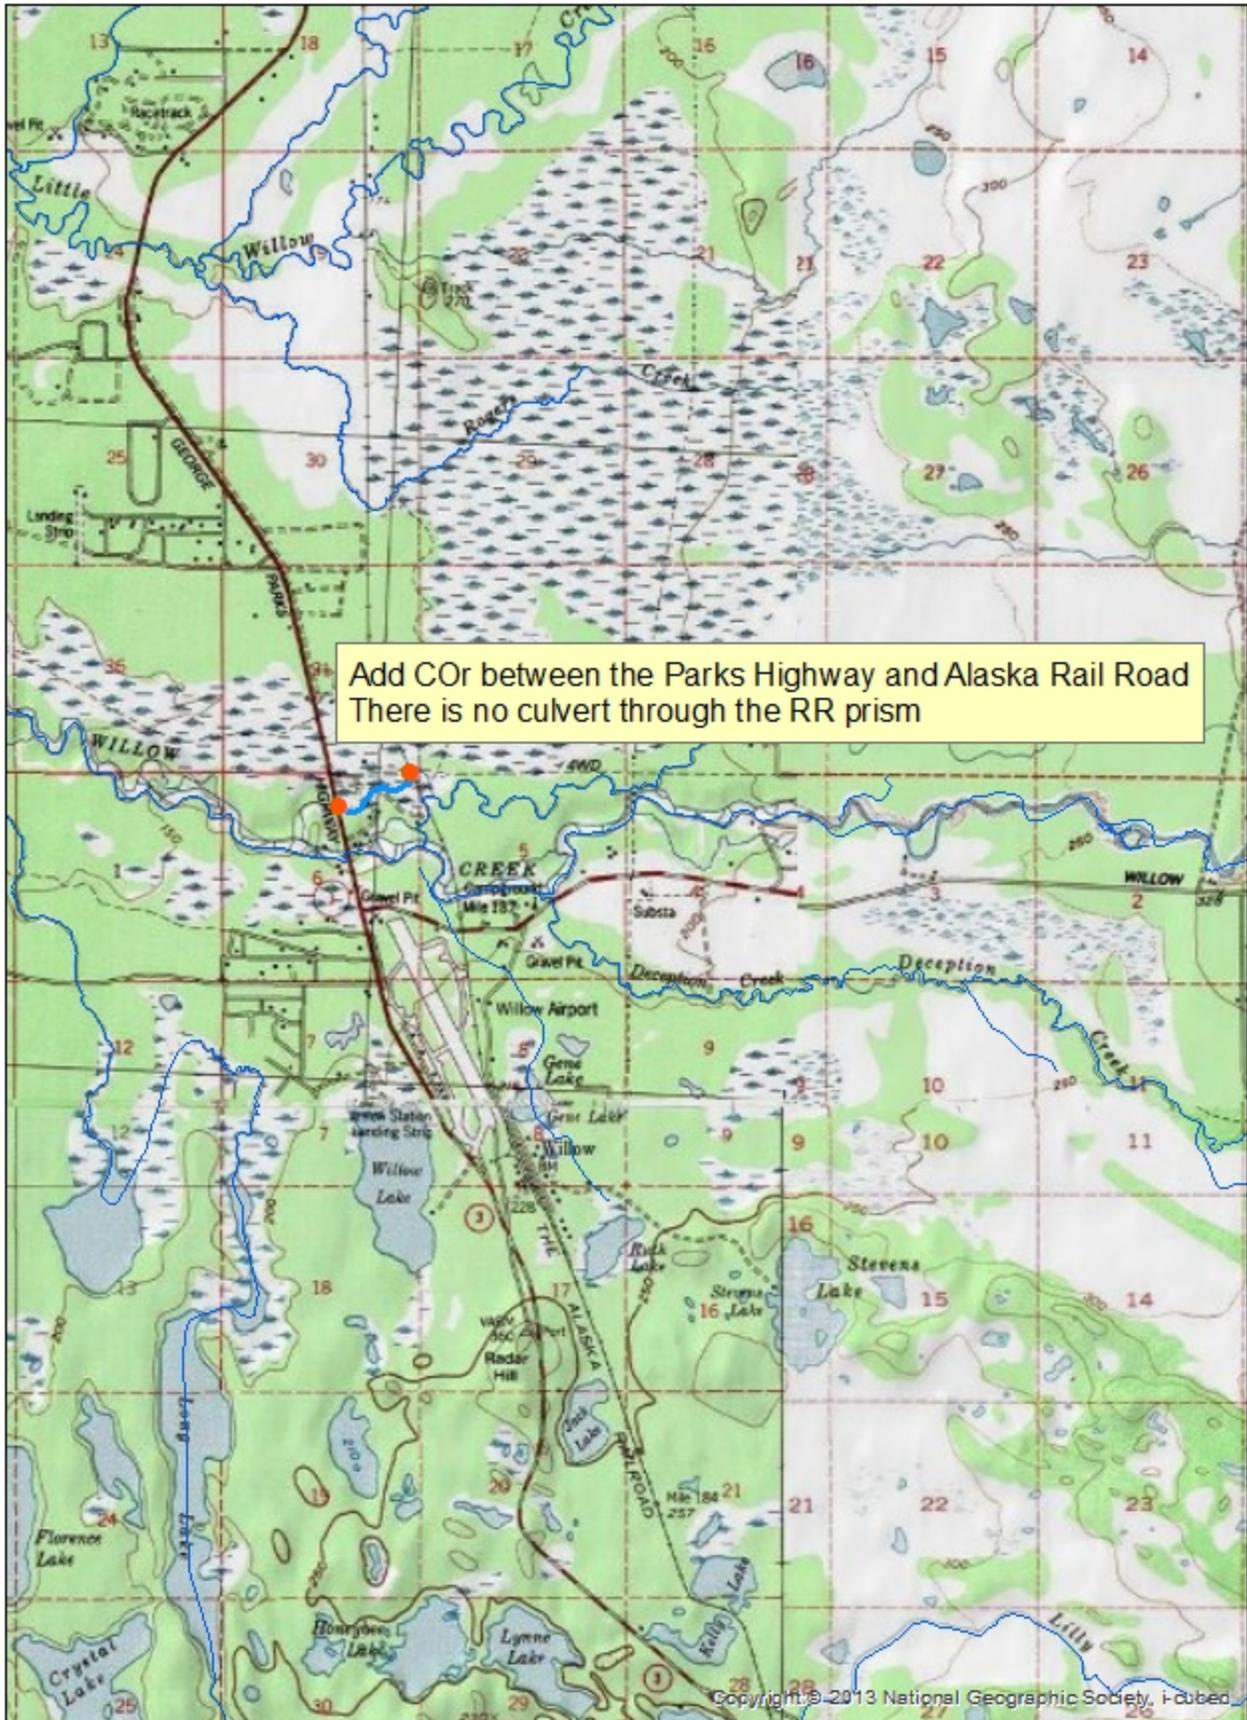

Signature: _____ Date: _____

Agency:

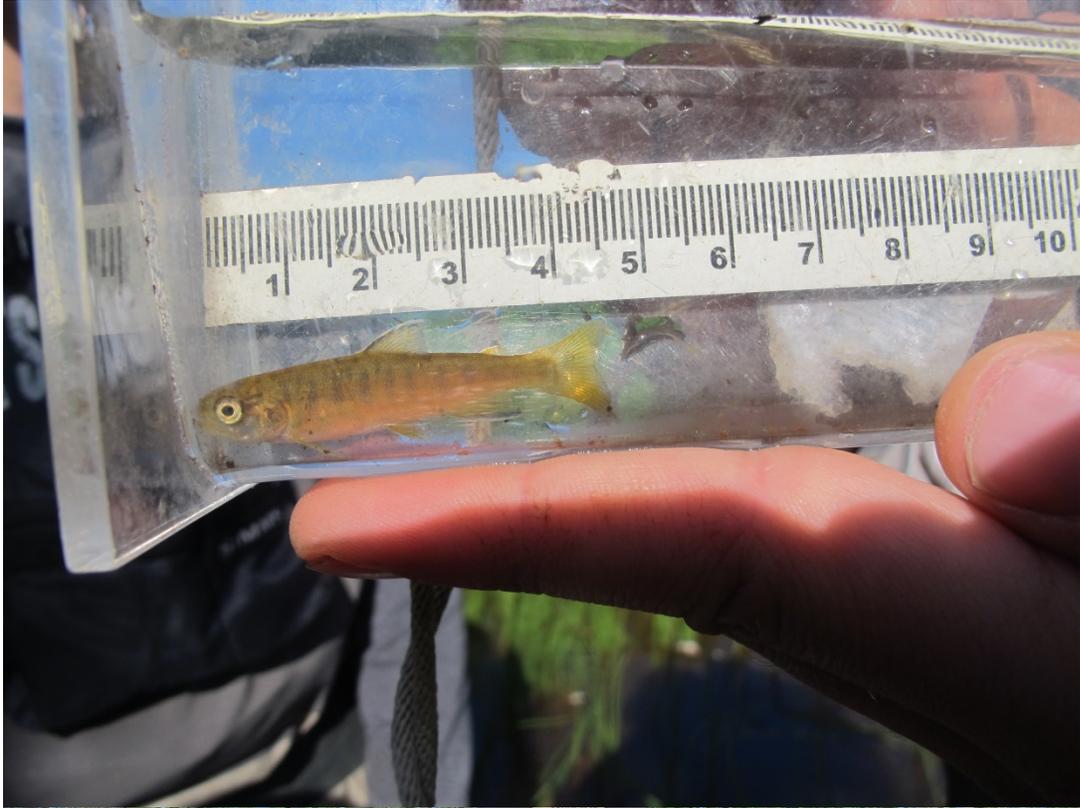

Address:

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.

Signature of Area Biologist: _____ Date: _____ Revision 11/13
Name of Area Biologist (please print): _____

Approximate location of reach to be included in the AWC

Juvenile coho salmon

Upstream side of Alaska Railroad, this pond is created by the lack of a culvert. Flow has been diverted along the railroad to a side channel of Willow Creek.
