JUSTIFICATION:

The Redoubt Bay and Lake Sockeye Salmon Management Plan was approved by the Alaska Board of Fisheries in January 2003. The plan provides a management approach for sport, subsistence, and commercial fisheries that harvest Redoubt Lake sockeye salmon based on an optimal escapement goal of 7,000 to 25,000 fish. The plan establishes a sport bag and possession limit of four sockeye salmon in Redoubt Bay and the Redoubt Lake drainage, prohibits snagging in Redoubt Bay from June 1 to July 15, and also prohibits snagging in Redoubt Bay by nonresident anglers for an additional period July 16 to August 31. The plan directs the department to establish sockeye salmon bag and possession limits of

six fish if the projected total escapement strength is greater than 30,000 sockeye salmon. As of July 14, 2004, 10,402 sockeye salmon had passed the Redoubt weir. Based on past run timing, escapement is expected to exceed 40,000 sockeye salmon. Therefore, the department is establishing a bag and possession limit of 6 sockeye salmon in Redoubt Bay south of 56° 54.71' N. latitude, and in the Redoubt Lake drainage, as directed under the management plan.
