

PERSONAL USE FISHING

Emergency Order

ALASKA DEPARTMENT
OF FISH & GAME

Under Authority of AS 16.05.060

Emergency Order No. 2-RS-1-23-08

Issued at: Soldotna, Wednesday, July 16, 2008

Effective Date: 12:01 a.m., Thursday, July 17, 2008

Expiration Date: 11:59 p.m., Thursday, August 7, 2008, unless superseded by subsequent emergency order.

EXPLANATION:

This emergency order extends the area that salmon may be harvested in the personal use salmon dipnet fishery on the Kasilof River. Effective 12:01 a.m., Thursday, July 17, sockeye salmon may be harvested by dipnetting from the shoreline, 24 hours per day, from ADF&G markers located on the Cook Inlet beaches outside the terminus of the river extending upstream to the Sterling Highway bridge. Additionally, sockeye salmon may be harvested by dipnetting from a boat, 24 hours per day, from ADF&G markers located on the Cook Inlet beaches outside the terminus of the river extending upstream to ADF&G markers at river mile 3.

REGULATION:

The provisions of 5 AAC 77.540 UPPER COOK INLET PERSONAL USE SALMON FISHERY MANAGEMENT PLAN (c)(2)(C) are superceded by this emergency order. Under this emergency order the following provisions are effective beginning at 12:01 a.m., Thursday, July 17, 2008 through 11:59 p.m., Thursday, August 7, 2008.

5 AAC 77.540 UPPER COOK INLET PERSONAL USE SALMON FISHERY MANAGEMENT PLAN.

(c) Salmon may be taken by dip net in the Kenai and Kasilof Rivers as follows:

(2) In the Kasilof River as follows:

(C) from the shoreline, from ADF&G regulatory markers located on the Cook Inlet beaches outside the terminus of the river upstream to the Sterling Highway bridge; and from a boat, between ADF&G markers located on the Cook Inlet beaches outside the terminus of the river upstream to ADF&G markers located at river mile 3.

Denby S. Lloyd,
Commissioner

By delegation to:

Robert N. Begich
Area Management Biologist

JUSTIFICATION:

The Department is forecasting a total return of sockeye salmon to the Kasilof River in excess of 1.3 million fish. The biological escapement goal of 150,000-250,000 sockeye salmon has been exceeded in nine of the last ten years. As of July 16, a total of 139,765 sockeye salmon have passed the Kasilof River sonar station. The Department projects that the escapement of sockeye salmon into the Kasilof

River will exceed the escapement goal. Therefore, it is warranted to increase the fishing area for the Kasilof River personal use salmon fishery.

DISTRIBUTION:

The distribution list for this emergency order is on file at the Region 2 Office of Alaska Department of Fish and Game, Division of Sport Fish, 333 Raspberry Road, Anchorage, AK 99518, (907) 267-2218.
