(5) Arctic grayling maybe taken from January 1 – December 31 in

(A) Stocked lakes and ponds; bag and possession limit of two fish, of which only one may be 12 inches or greater in length; for the purpose of this subparagraph, “stocked lakes and ponds” has the meaning given in (3)(A) of this section;

Denby S. Lloyd,

Commissioner

By delegation to:

Chuck Brazil
Assistant Area Management Biologist

JUSTIFICATION:

Anchorage area stocked lakes are popular and important fishing areas for Alaska's largest urban center. Area stocked lakes average 40,000 angler days of effort each year, and almost all fish stocked each summer are harvested that same year. There are twenty-six stocked lakes in the Anchorage area with an annual stocking goal of 113,000 catchable Arctic char and rainbow trout, and 5,000 fingerling Arctic grayling. The number of fish available to be stocked in all Anchorage area lakes for the 2010 season is 80,680 of which only 18,000 are catchable size. To conserve these fish and help ensure angler opportunity throughout the fishing season, it is necessary to reduce the bag and possession limit in Anchorage stocked lakes from 5 per day of each species to 2 per day of each species, with only 1 of each species greater than 12 inches in length each day.

DISTRIBUTION:

The distribution list for this emergency order is on file at the Region II Office of Alaska Department of Fish and Game, Division of Sport Fish, 333 Raspberry Road, Anchorage, AK 99518, (907) 267-2218.
