**JUSTIFICATION:** Hatchery-produced king salmon are expected to return to Medvejie Hatchery in numbers that exceed hatchery broodstock needs. The Alaska Board of Fisheries authorized the department to increase bag limits and liberalize fishing methods in designated harvest areas to harvest surplus hatchery-produced king salmon [5 AAC 75.003 (2) (B)]. The department is eliminating the king

salmon length limit of 28 inches and the non-resident annual limit in this area to provide recreational anglers the opportunity to harvest these surplus fish.
