JUSTIFICATION:

The Kenai River Late-Run Sockeye Salmon Management Plan 5 AAC 21.360 (h)(2) stipulates that the department may, by emergency order, increase the bag and possession limit as appropriate when the department determines that the abundance of late-run Kenai River sockeye salmon exceeds 2,300,000 fish.

As of July 19, 2013, the department projects the Kenai River sockeye salmon run is greater than 2.3 million fish and anticipates the optimal escapement goal (700,000 – 1,400,000 sockeye salmon) will be achieved. Therefore, it is warranted to increase the bag and possession limit for salmon, other than king salmon, to six per day, twelve in possession, of which no more than two may be coho salmon.
