

Nakat Lagoon
101-11-47
7-8-75
Downey

101-11-47 - Flows through and over large boulders - looked like no access to fish to me.

Very small and shallow, 2' wide and 1" deep. Smells bad like it comes from a sump or sulphur spring - no fish potential here.

NAKAT LAGOON

Grass to about 10' depth around the lagoon.

Lagoon is 50-60% dry at low tide.

Surveyed at 1/2 tide.

Stream is about 50' long and 2' wide. Large gravel and boulders. Very low spawning potential - possibly couple pairs.

Steepens rapidly.
