

Three pool/riffle areas from mouth to falls; spawning possible on margin of swift riffles.

Spawning area: 134 m²
(150'x24'x40% ASA)

Down slope movement in this area - banks steep (vertical rise of 50 feet).

← Station 1

Poor quality hemlock found along both sides of stream.

Dead tree, no barrier

Probably a low-use coho stream.

Tree line →

Station 2

← Locally I.T. stream; no spawning area.

150 feet.
