Downey, Joyner

Area of windfall and is braided. Swifter water.

Appears to continue for quite a distance.

Stopped 1.25 miles above I.T.
Width - 30' (station #2)
Depth - 10"

20 chum, a couple approach 20 pounds.

Good gravel and spawning area. Gravel is 2-6" with some boulders.

50 live pink.
50 carcasses.

Some very good pool and rearing area within the stream. Saw many coho fry.

60% available spawning area.

Easy stream to walk, stable banks and good gravel bars.

Gravel size is 2-4" with some larger boulder type gravel.

Split channel area and windfall, no barrier.

Good gravel and spawning area.

25 live pinks.
20 carcasses.

Appears to be a very good stream.

Small tributary

More constricted with more velocity here. Approximately 40' wide and 10" deep. Still good gravel 2-6".
20 live pinks.
30 carcasses.

60' wide.
50 live pink.
Several pink carcasses

Station #1 : 200 yards of I.T. area. Generally larger gravel but looks pretty good. Some areas here are somewhat swift, but mostly o.k.

Gravel is 2-6".

Grassy

Large grass flats
