

15' barrier falls
50 yds above top of intertidal.

A small stream at normal flow and could support a few spawners (30-50 at a guess) but I'd say it generally had very poor or almost no fishery potential.

About 1/2 tide and ebbing, sunny day.

4' wide and 4"-6" deep

Large gravel and boulders start here.

Some fair gravel here and could support a few spawners.

Flows under this small area of debris underground.

2' wide and 2" deep

4' wide, 4" deep

Nichols Lake

1/2 mile to lake from I.T.Z.

10% spawning (bedrock pools and interspersed cobble in this 200 yds)

75' wide, 10" deep

Nichols Bay - Nichols Creek
102-10-60
Downey - Elton
5-26-74

50% spawning (cobble and slower water) in this 150 yards.

75' wide, 10" deep

0% spawning (bedrock and boulders) in this 200 yards)

65' wide, 12" deep

10% spawning in this 350 yards (boulders, bedrock, and cobble)

3' wide tributary, 325 yds above I.T.Z.

Steep hillside

65' wide, 13" deep

Steep hillside

Station #1 (75 yds above I.T.Z.)

0% spawning in this 75 yards to station #1 (steep gradient with boulders and bedrock)

20' wide, 12" deep

Steep hillside

20' wide, 12" deep

I.T.Z. 500 yards.

Boulders and dark rock with some bedrock.
No fisheries potential.
