Trails & Survey Routes This stream "Very difficult" walking due to the large massive amounts of windfall in, over and around the stream from loggins
 Aerial Survey Notes Dark muskeg colored water and lots of log jams. Would be difficult or impossible to survey from the air.
 Anchorage Could probably anchor somewhere here but would recommend anchoring for the night in Lancaster Cove.
 Tide Stage When Surveyed Almost high.

FISHERY RESOURCES

Commercial Fisheries pink, chum: left minnow trap in overnight catching four cutthroat trout and 1 stickleback.
 Escapement 300 pink and 600 chum on 9-29-48.
Available spawning area - 209 M²
 Species Composition 66% chum and 33% pink.

Timing _____
 Schooling areas Off the mouth

Shellfish Potential None - very rocky intertidal zone.

Sport Fisheries Unknown - could have good potential with the lake systems.

Land Use at Present None

History of Land Use This area along stream has been logged.

Rehabilitation Potential Some of the windfall could be removed but to what avail I'm not sure - no barriers on the stream.

Soils Logging has caused 'much silt' to settle in the slower moving areas of the upper stream here - flat gradient so no slumpage has occurred. All logged.
