MIDSECTION OF
CRAB CREEK

MUSKEG AREA AT THE HEADWATERS OF
103-60-47 HATCHERY CREEK AND 103-60-50
CRAB CREEK

103-60-10500

Weather: lt. rain

Tide: 1/4

Air: 52°F

Water: 50°F

pH: 7.7

color: lt. brown, clear

flow: 47 cfs

Crab Creek
lower section

Larson, Rahe, Freitag

900'

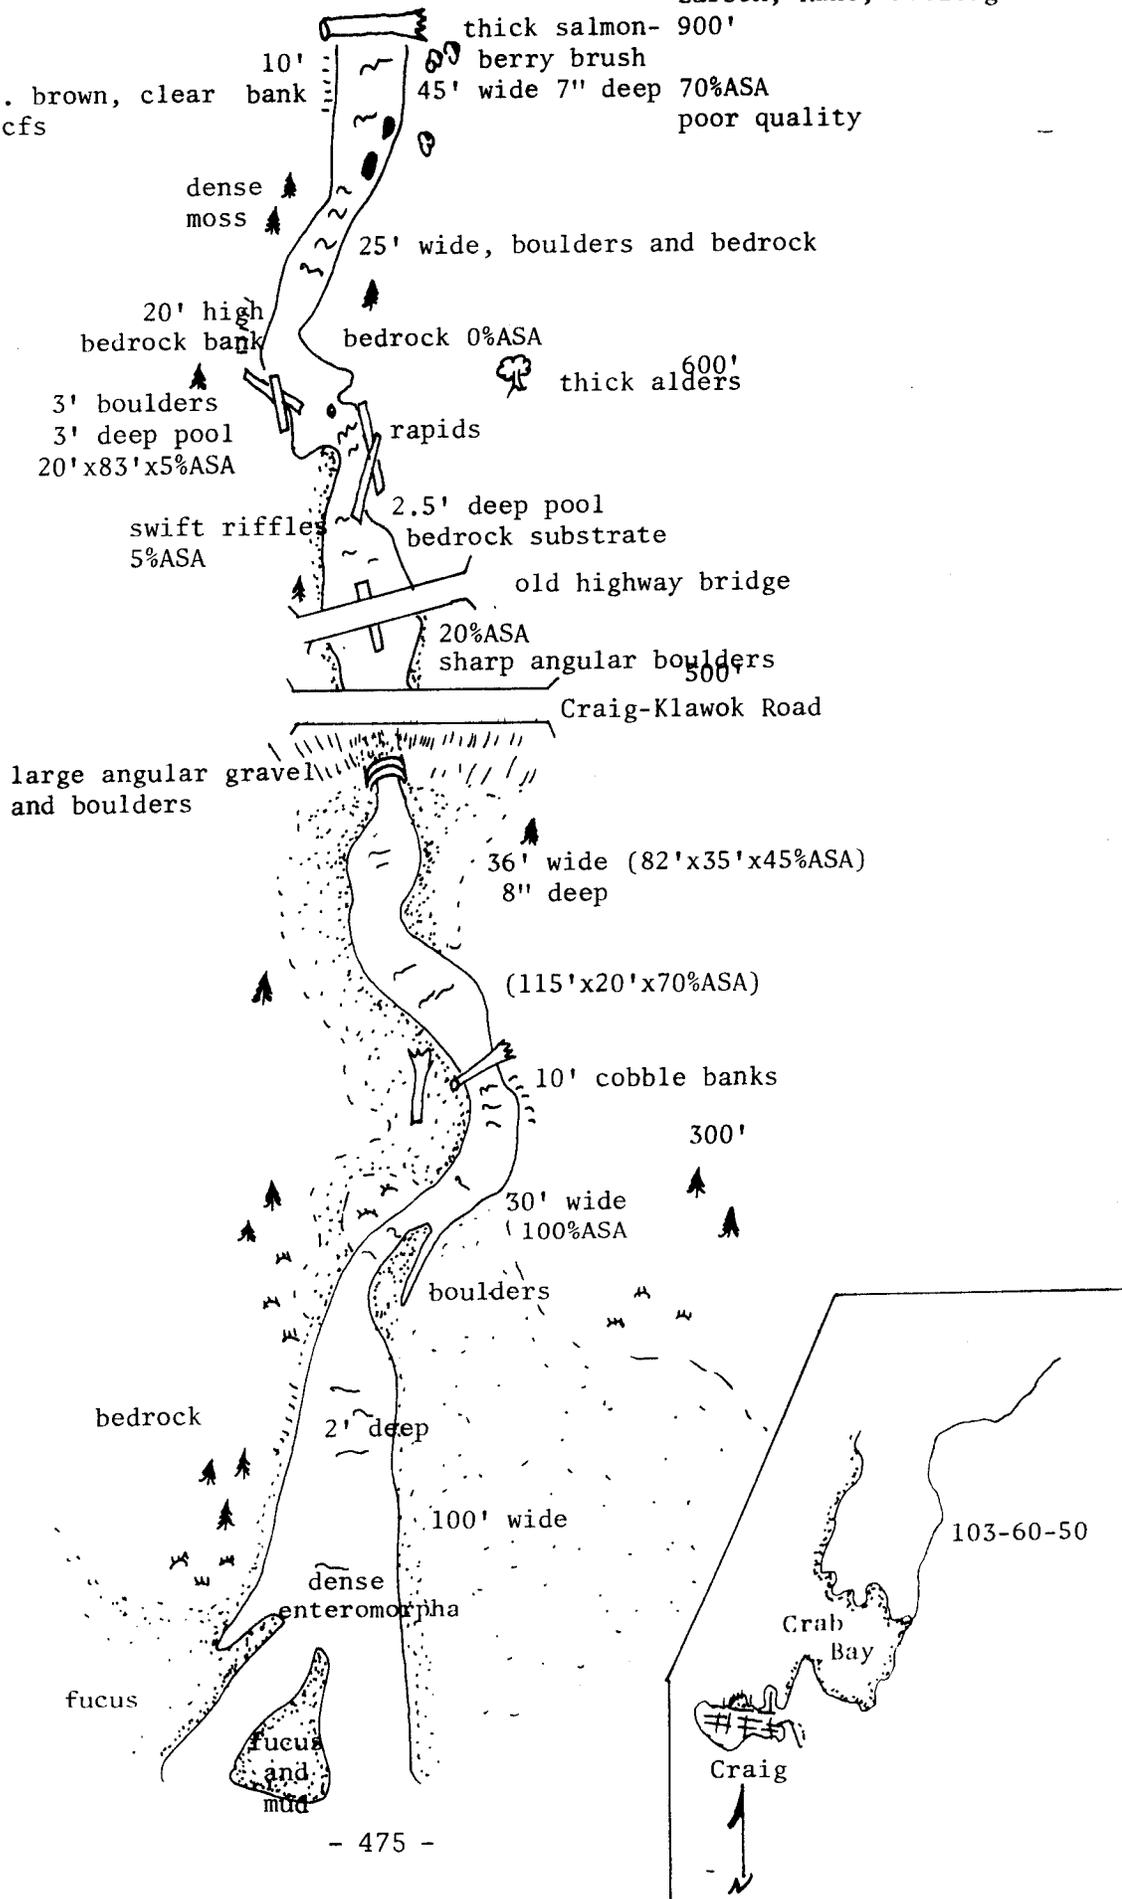

thick salmon-

berry brush

45' wide 7" deep

70%ASA

poor quality

103-60-50
 Crab Creek (upper station)
 8-18-77
 Larson, Rahe, Freitag

stream 39' (12m) wide
 787' (240m)

numerous coho fry

pH 7.5
 water temp: 60°F
 air temp: 75°F

25% ASA to 4' (1.2m) deep); wolf and deer tracks; mud and silt bottom detritus
 656' (200m)

stream 39' (12m) wide

very low volume tributary

stream 26' (8m) wide

silt covered gravel
 1 live pink salmon

25% ASA
 blowdown
 492' (150m)

stream 33' (10m) wide

total channel width only 5-10' wider than wetted stream width although stream is as a low flow stage

stream width 23' (7m) silt covered gravel

50% ASA
 328' (100m)

deer, bear and mink tracks
 excellent rearing
 no spawning area
 subject to extreme warming without overhead cover
 45' wide
 3' deep

large alders

coho in small streams through-out area
 6' wide rearing stream

good rearing areas

average width 26' (8m) 50% ASA

2' high soft brush covered banks

downstream

thick brush

very little algae, dense moss on logs in stream; several areas with vascular water plants

164' (50m)

water lt brown slightly turbid visibility approx. 2'

768 m² ASA for length of survey

numerous small rearing fish coho and trout

4' high slightly undercut banks; fine grained silt and dirt soft sandy substrate
 1-3' deep sluggish
 32' wide

PEAK ESCAPEMENT RECORD

103-60-50 Craig Crab Bay (0.5 mile east of Craig N.E. shore)

DATE	PINK	CHUM	OTHER SPECIES	REMARKS
