

Air: 56°F
Water: 49°F
Flow: 2cfs

Indiada Cove
Suemez Island
7-13-77
Larson, Peese

Access to this stream is prevented by an eight foot high barrier of logs and sand built by wave action. The stream waters now flow into this barrier and percolate out onto the beach. This is not now a salmon stream, however there is fair rearing for a small number of coho and approximately 140 meters² of spawning area (600'x5'x50%ASA) above the barrier.
