

Name: Holbrook Creek  
Latitude: 56 02 54 N 53  
Longitude: 133 28 56 W 57  
Geodetic Map No: Petersburg A-5  
Location: Head Davidson Inlet

103-90-10650  
Catalog No: 103-90-064  
Former Stream No: WC70, 9, FWS 29,  
ADF&G 154  
Work Area: Ketchikan  
Watershed Length: 3.5 miles with lakes  
Drainage Area: 2.88 square miles  
Water Supply Type: Lakes and surface  
runoff.

Trails & Survey Routes: Difficult walking - lower 400' to falls surveyed.

Aerial Survey Notes: \_\_\_\_\_

Anchorage: Davidson Inlet but rocks and shoals; or Tokeen Cove on Marble Island.

Tide Stage when Surveyed: Incoming tide.

RESOURCES

COMMERCIAL FISHERIES (species, escapement, timing, spawning area):  
Coho rearing in stream; historically utilized by pink and chum salmon.  
Alaska Fisheries Atlas lists this as a coho, pink and chum stream.

Schooling Areas: \_\_\_\_\_

Spawning Areas: Poor ITZ spawning conditions; turbulent water to falls.  
572 m<sup>2</sup> for area surveyed.

SHELLFISH POTENTIAL: None noted.

SPORT FISHERIES: No sport fish species noted.

LAND USE (history, present, proposed): Areas of hand logging.

REHABILITATION POTENTIAL: Removal of obstruction at mouth; remove windthrow  
falls 200' upstream in right channel; area appears to level off above falls -  
good potential for ladder.

SOILS: Stable banks throughout.

GAME RESOURCES (species, use, habitat): Deer sign near mouth.
