ADF & G, Sport Fish Division
P.O. Box 499
Sitka, Alaska 99835

Dear Art,

As outlined in your letter of July 25, we have opened the fish valve at Sawmill Creek to produce a flow of 50 CFS. as of September 2, 1977.

When atmospheric conditions permit, our painting contractor will resume his work at the penstock. At that time we request that the contractor be allowed to reduce the flow or shut off the valve on a daily basis.

Sincerely yours,

James D. Dwyer
