Lake Survey Form

Manzoni #

Lake Upper Granite Creek Basin Sec. ____, Twp. ____, Rge. ____, Lat 55° 40' N., Long. 130° 45' W.
Acreage est. 1,000 Max. Depth est over 150 ft. Altitude 1348 ft.
Location Between Rudyerd Bay and Walker Cove Water Color (clear, silty) Clear
Type of Bottom Bed rock and slide rock with some fine stuff in the depths
Inlets (name, size, permanency) No names but there are several some with gravel at the mouth along lake
Benchmark (Description) None
Outlet (size, immediate and main drainage) 10-125 ft.^{3}/ sec into Behm Canal
Barriers High falls between the several lakes and below the lower one
Use (Private, public, semiprivate) Public, in Tongass National Forest
Public Access Site None
Facilities (Campground, roadhouse, etc.) None
Native Fish Species None in 22 net days of fishing
Introduced Species None
Spawning Grounds Plentiful in lake outlet and on the gravel fans at the inlets

Fishing History No fishery

Other Uses Used as a base of goat hunting operations
Fish Losses None
Character and size of watershed Alpine and of approx. 10 square miles

Remarks This lake is the upper of three connected lakes in a four lake system. There seemed a fair abundance of food organisms and the lake should produce well.
