Attached is a proposal by F.R.E.D. Division to stock chinook fry into Redoubt Lake. You should have already received a copy of my memo to Dave Barto with my evaluation of the proposal. Basically, I don't believe it will produce much of a benefit. At best, this project would be experimental; and, if it is conducted, we should make sure that proper evaluation is done, i.e. number of smolts produced is validly enumerated.
