City Manager
Sitka Borough
Sitka, Alaska 99835

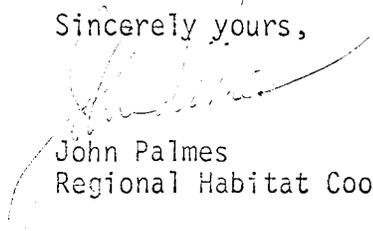

Dear Sir:

The Department of Fish and Game has recently received a request from Mr. Muilen Isaacs to divert a section of the stream flowing into Swan Lake that crosses his property. We are trying to establish a breeding population of rainbow trout in this stream and therefore wish to minimize disturbance to the system. We also are aware that the creek could probably benefit from some cleanup.

We therefore would like to solicit your help in establishing a development plan for the creek which anticipates future developments and diversions and establishes guidelines for these.

In addition, it would be good to plan a way that the public could become involved in cleanup of the stream.

Sincerely yours,

John Palmes
Regional Habitat Coordinator
