

MEMORANDUM**State of Alaska**

TO: **Gil Ziemer, Director**
Engineering & Services Division
& **Roger Wadman, Fishery Biologist**
Alaska Department of Fish and Game

DATE: **June 20, 1963**

FROM: **Alex H. McRea, Director**
Sport Fish Division
Alaska Department of Fish and Game

SUBJECT: **Swan Lake Project, Sitka**

Joe Hong, Urban Renewal, and John D. Ballard, P.E. (Consulting Engineer, Box 920, Sitka) were in today in relation to the fishery requirements on the project. I told them that the screening, etc., would be planned by Ziemer and Wadman. Ballard will send the profiles, etc., to Ziemer and we are to design to whatever stage of completeness we can. I definitely gathered that the city is starting to squirm on costs.

If Roger has an opportunity, he can review the city's plans for the lake with Fermin Guttierze, Sitka Public Works Director and should also check with Ziemer on design. I indicated that we would need an upstream control as well as the screen. Do we?
