Dear Larry:

I was very sorry that conditions were such I was unable to stay at the lake until your arrival around the 18th or 20th. We had a very poor season and it was necessary that I return to Ketchikan and go to work.

I am still looking forward to the Kokanee plant and you are most welcome to use the cabin at Thayer. That is the small end one you stayed in before. It has been secured for the winter so if you use the kitchen stove it will necessitate removing the cover first. The fireplace is also covered.

We are more convinced than ever after the experience of this past summer that Thayer lake is badly in need of some big fish. We missed out/^{BB}the Boeing charter yacht group who were being flown into places such as ours for their sportsmen to catch some big fish.

One small request, Larry. Would you mind going through the back door of the main cabin and emptying the thermos bottle sitting on the drainboard. Just remembered that and it will burst this winter if not empty. Thanks. (You'll have to throw water outside as drain is disconnected too).

Would appreciate hearing from you after you make the plant.

With best wishes,

Bob Nelson
