Fishermen and processors are reminded that all salmon, including steelhead, commercially harvested but retained for personal use and not sold, must be reported on fish tickets at the time of other fish from an opening are delivered.

All Chinook salmon harvested in the commercial drift gillnet fisheries may be retained and sold. Chinook salmon less than 28" in length, and those of Alaska hatchery origin, will not be counted against the Alaska allocation of the Pacific Salmon Treaty harvest. Therefore, fishermen and tenders are asked to keep Chinook salmon harvested in THAs separate from those harvested in traditional areas. Separating these harvests will greatly assist in fish accounting purposes in regard to the Pacific Salmon Treaty. In addition, Fish and Game samplers working at the processing facilities will be sampling Chinook salmon harvest to identify Alaska hatchery-reared Chinook salmon so those fish are not counted against the Alaska share of the harvest.

The Emergency Order corresponding with this announcement is EO 1S2319.
