2019 HAWK INLET TEST FISHERY UPDATE # 2

The department conducted the second of the 2019 Hawk Inlet shoreline test fisheries yesterday. Comparing the total harvests for the day to the ten-year average total harvests, sockeye, pink, and chum salmon were above average, and Chinook and coho salmon were below average. For the approximate date, the pink salmon harvest was 149% of the ten-year average and 79% of the recent odd-year average. The sockeye salmon harvest was 167% of the 10-year average and the chum salmon harvest was 118% of the 10-yr average.

The pink salmon sex ratio was 55% male, below the average of 67% male for previous years test fisheries conducted on or about this date.

Hawk Inlet test fishery updates will be posted on the ADF&G web site listed below.
