#### 2019 HAWK INLET TEST FISHERY UPDATE # 4

The department conducted the final 2019 Hawk Inlet shoreline test fisheries yesterday. Comparing the total harvests for the day to the ten-year average total harvests, Chinook and sockeye salmon were above average, and coho, pink, and chum salmon were below average. For the approximate date, the pink salmon harvest was 35% of the ten-year average and 22% of the recent odd-year average. The sockeye salmon harvest was 106% of the 10-year average and the chum salmon harvest was 36% of the 10-year average.

The pink salmon sex ratio was 48% male, below the average of 54% male for previous years test fisheries conducted on or about this date.

Hawk Inlet test fishery updates will be posted on the ADF&G web site listed below.
