Prince William Sound Area Tanner Crab Commissioner's Permit Fishery Eastern and Western Districts Only Emergency Order # 2-SF-E-01-20

Alaska Department of Fish and Game (ADF&G) announces the Commissioner's Permit Tanner crab fishery in the Eastern and Western Districts (Figure 1) of the Prince William Sound Area (PWS; 5 AAC 35.311) will open in 2020. PWS is a superexclusive registration area for Tanner crab (5 AAC 35.306 (a)) and in order to participate a valid 2020 CFEC interim-use permit card for PWS Tanner crab (T09E or T91E) is required.

There is a registration deadline of Tuesday, February 18 at 5:00 p.m. Permits will not be issued after this date.

The season will open 12:01 a.m. March 1 and close 11:59 p.m. March 31, unless closed earlier by emergency order (EO). In addition, for safety and a fair start, if the National Weather Service (NWS) issues a 48-hour marine weather forecast for Prince William Sound (PKZ125) at 4:00 a.m. Saturday, February 29 that contains a gale warning, the PWS Commissioner's Permit Tanner crab fishery opening will be delayed for 24 hours; if delayed, the 4:00 a.m. NWS marine weather forecast for PWS will be checked each subsequent day until no gale warning is issued for the upcoming 48-hour period, or until 12:01 a.m. March 4, when the season will open regardless of the forecast.

During the fishery, a maximum of 25 Tanner crab pots may be operated by each vessel with required identification (pot) tags. Log sheets must be completed for each pot set. Permit holders must check in with ADF&G Homer staff prior to each fishing trip and accommodate an ADF&G onboard observer upon request.

Depending on fishery performance, statistical area closures may occur by EO prior to the season closure; area closures may be announced with a minimum of 24 hours' notice. The fishery will be monitored closely with mandatory daily call-in reports, as specified on the Commissioner's Permit. If fishermen do not adhere to daily call-in requirements, management will be conservative and enforcement action will be taken.

ADF&G has initiated a PWS male Tanner crab tagging study to observe small-scale movement patterns and distribution. Sublegal and legal male Tanner crab were tagged with a yellow disc on a posterior leg which is labeled with a unique identification number. ADF&G is requesting all participants in the Commissioner's Permit Tanner crab fishery record the tag number in the comments section of log sheets. Information from this study will contribute to the assessment and management of PWS Tanner crab.

Commissioner's Permits are available through the Homer ADF&G office. Please contact the Homer office to apply or with questions: (907) 235-8191 during regular business hours.
