2021 Yukon River Salmon Fall Fishery Announcement # 13 **Upper Tanana River Subsistence Fishing Schedule**

The 2021 fall chum salmon run size is critically low, worse than last season's fall chum salmon run that was the lowest on record. As of August 12, the Yukon River mainstem sonar near Pilot Station estimated 83,000 chum salmon (summer and fall) have passed upriver. Genetic mixed stock analysis results indicate only 39,000 of those were fall chum salmon, which is well below last year's genetic estimate of 99,000 fall chum salmon for that date. Based on inseason assessment projects at the midpoint of the run, the current projection indicates a run size of approximately 100,000 fish. According to the Fall Chum Salmon Management Plan, the inseason projection does not meet the threshold of 300,000 fish needed to allow subsistence fishing. In addition, the projection is unlikely to meet the drainagewide escapement goal of 300,000-600,000 fall chum salmon and tributary escapement goals. Therefore, subsistence salmon fishing will be closed to begin the fall season. Subsistence fishermen should prepare for continued closures.

Consistent with transitioning to fall season management, the following management actions are in effect:

Subsistence Fishing

Upper Tanana Area (the Tanana River drainage from the confluence with the mouth of Volkmar River on the north bank and the mouth of the Johnson River on the south bank upstream to the Tanana River headwaters, which includes Dot Lake, Tanacross, Tetlin, Tok, Northway, Nabesna and all tributaries):

These areas will transition to fall season management at 12:01 a.m. on Monday, August 16, and remain closed to subsistence salmon fishing.

Gillnets of 4-inch or smaller mesh may be used during subsistence salmon fishing closures to target non-salmon. However, due to the conservation concern for Chinook and chum salmon, 4-inch or smaller mesh gillnets are restricted to a maximum length of 60-feet. Fishermen are reminded to use this gear in areas where non-salmon species are abundant to avoid incidentally harvesting Chinook and chum salmon.

Additionally, other legal gear to take non-salmon species during subsistence salmon fishing closures in this area includes hand line, longline, fyke net, dip net and spear.

A subsistence fishing permit is required for all species in the Upper Tanana Area.

The department would like to thank fishermen for their continued cooperation during these times of conservation for Chinook and chum salmon.

Subsistence permits are available at www.adfg.alaska.gov/store.

COVID-19

Under Alaska's Health Advisories 1, 2, 3, and 4, subsistence and commercial fishing is an Essential Business and is part of Alaska's Essential Services and Critical Infrastructure. Commercial fishermen should ensure that all travel and other activities in support of commercial fishing operations follow protocols in Alaska COVID-19 Health Advisories. COVID-19 Health Advisories may be found here: <https://covid19.alaska.gov/health-advisories/>.

This is an announcement by the ADF&G in cooperation with the U.S. Fish and Wildlife Service.
