Waters north of this line, within sloughs, and in Boswell Bay within the bay (5 AAC 24.350 (1)(A)) are closed to commercial and subsistence salmon fishing during all periods.

During the commercial fishing season, subsistence harvest may occur in the Copper River District concurrent in time and area with commercial fishing periods until the Copper River District is closed at the end of the season. Additionally, waters of the Copper River District, excluding the expanded Chinook salmon inside closure area, will open to subsistence fishing from 6:00 am to 10:00 pm on all Saturdays between May 16 and October 31. Prince William Sound Management Area salmon subsistence permits may be obtained through any ADF&G office or online (<https://www.adfg.alaska.gov/Store/>). **In Cordova, permits will be available during normal business hours Monday through Friday from 8:00 a.m. to 12:00 p.m. and 1:00 p.m. to 5:00 p.m.** ADF&G staff will not be available to issue permits before hours, after hours, on state holidays, or on weekends. **Permit holders are encouraged to call the Cordova office at 907-424-3212 or report online (<https://www.adfg.alaska.gov/Harvest/>) to provide preliminary harvest reports to assist with inseason harvest tracking.**

Cumulative sonar count through 5/17 is 0 fish whereas 1,331 fish are projected by this date. The 0600 count for 5/18 is 6 fish. Between the afternoon of May 15 to this morning, water level in the Copper River at the outlet of Miles Lake has risen ~ 1ft. Only the north bank sonar has been deployed so far this season. The north bank sonar was first deployed at 1300 on 5/17 and 24-hour data collection is anticipated from this point forward. Shore ice and ice flows are currently preventing south bank sonar deployment. Preliminary harvest estimate from the 12-hour period that occurred on Monday, May 16 was 2,700 Chinook and 12,800 sockeye salmon with 384 deliveries reported. This compares to a projected harvest of 20,700 sockeye salmon for this period.

**BERING RIVER DISTRICT:** Bering River District, west of a longitude line at 144° 28.20' W., will open at 7:00 am on Thursday, May 19 for a 12-hour commercial drift gillnet fishing period. The intent of this opening is to target Copper River sockeye salmon that are traveling through the western portion of this district. **As overlap with the Bering River sockeye salmon run timing increases, the likelihood of future early season opening in the Bering River District will diminish. Additionally, future openings of the Bering River District will be contingent on accurate reporting of harvest from within this district.**
