### 2022 Yukon River Salmon Summer Fishery Announcement #13 District 6 (Tanana River) Subsistence and Personal Use Fishing Schedule Districts Affected: Upper Yukon Area

The 2022 Chinook and summer chum salmon counts at Pilot Station sonar are well below average for this date. Consistent with the preseason management strategy to take a conservative approach this season, subsistence and personal use fishing will be closed during the trickle and first pulse of the Chinook salmon run. Salmon closures will likely remain in effect through much of the summer season, unless run abundance indicates escapement goals might be met.

The opportunity to harvest nonsalmon for subsistence with 4-inch or smaller mesh gillnets is available during salmon closures; however, 4-inch or smaller mesh gillnets are being restricted to 60 feet or shorter length. Fishermen should fish this nonsalmon gear in areas where resident species are more likely to be encountered.

Due to the low run sizes, we are encouraging fishermen to target nonsalmon and to release Chinook and summer chum salmon alive from nonsalmon gear types to protect spawning salmon. Other legal gear types to take nonsalmon for subsistence include hand line, longline, fyke net, dip net, and spear.
