The Chinook salmon commercial, subsistence, and sport fisheries in the Situk River drainage are managed under the guidelines of the Situk-Ahrnklin Inlet and Lost River King Salmon Fisheries Management Plan (5 AAC 30.365). The plan directs the department to manage fisheries to achieve a biological escapement goal (BEG) range of 450-1,050 large (three ocean age and older) Chinook salmon to the Situk River. Currently the Chinook salmon run is projected to achieve the midpoint and near the upper end of the escapement goal of 1,050 fish. Per the Situk-Ahrnklin Inlet and Lost River King Salmon Fisheries Management Plan, Chinook salmon retention is being opened.

Subsistence fishermen are reminded that when fishing in the Situk River they are required to attend their gillnet at all times when it is being used to take salmon.
